ALFA ROMEO ON THE ROAD CHARGES

ON THE ROAD (OTR) CHARGES INCLUDE:

First 12 months government Vehicle Excise Duty depending on CO2 emissions (see table below), vehicle first registration fee (£55), number plate (£25.53) and delivery costs (£700).

VEHICLE EXCISE DUTY (ROAD FUND LICENCE) VALID FROM 1ST APRIL 2026

New cars are classified into one of 13 bands, depending on their carbon dioxide (CO2) emissions level, measured in grams per kilometre (g/km).

BENEFIT-IN-KIND TAXATION

The company car Benefit-in-Kind Taxation scale is linked to the CO2 emissions level. The table right shows the percentage of the car price to be taxed (P11D value). A simple explanation of how to calculate BIK is shown below.

EXAMPLE OF HOW TO CALCULATE BIK

1. Look at the table on the right and find the BIK tax banding to be applied according to the CO2 emissions of your car. (For example a petrol car emitting 99G/KM CO2 is 24%).
2. Work out the car's price to be taxed (P11D value) which is calculated as: Total Retail Price (Basic Price + VAT) + Number Plate (£25.53) + Delivery costs (£700) + Options (Including VAT).

3. Calculate the BIK as follows: P11D value x BIK tax banding percentage.
4. Multiply BIK figure (from 3) by your personal tax band – i.e. 20% or 40% to give your annual BIK costs.

2026-27 % BIK RATE
